Plan of Correction

1. **POC: TECHNICAL ASSISTANCE:** CCFI provided technical assistance concerning a portable sink in Room 6. CCFI conducted walkthrough of facility to double check number of sinks and toilets in the facility. After reviewing max capacity worksheet, the portable sink is not counted in the facility's max capacity. Therefore, this does not affect the facility's capacity. The facility was given options regarding the portable sink. The director chose to have all children in Room 6 in pull-ups or potty-trained. Room 6 has two year old children. The facility will have this in place by Monday, September 4th. The facility must remove the portable sink from the premises by Monday, September 4th. Director will send CCFI a picture of the sink removed from the facility. CCFI also conducted walkthrough of facility and all classrooms were in compliance with staff-to-child ratio and letters of suitability were in compliance
