2. **Out of Compliance:** Concrete footings are at least six inches below ground surface. (Rule 1.10.2(2) Page 46)
3. **Out of Compliance:** Appropriate surfacing material is present and meets minimum required compressed loose-fill surfacing depths (e.g., 6 inches for shredded/recycled rubber; 9 inches for sand, pea gravel, wood mulch (non-CCA), and woodchips). (Appendix D 2.4 & 2.5 Page 8-10)

Plan of Correction

1. **POC:** The licensing official observed concrete footings exposed on the large composite playground structure. All anchoring devices for playground equipment, such as concrete footings or horizontal bars at the bottom should be installed below ground level and beneath the surfacing material. This will prevent tripping hazards. Children should not utilize this area until corrections have been completed.

2. **POC:** The licensing official observed there was no surfacing material present on the playground area underneath/around the large composite play structure. Per Mr. Owen & Mary Rhodes, owners, the surfacing (pea gravel) should be delivered within a week or so. Elevated playground equipment should have the appropriate surfacing material to provide a protective surface. 6 - 9 inches of surfacing is needed underneath/around the playground structure. Children should not utilize play equipment until corrections have been completed.
