Findings/Comments The licensing officials met with Farenti Lambert. Mrs. Lambert took us to the second location for a possible daycare facility.

The purpose for this visit was for a new site measurement and to provide (T.A.) technical assistance.

The licensing officials along with Mrs. Beck-Lee, and Mr. Chad Allgood conducted a new site measurement at this second location.
The new maximum capacity measured (43) capacity for the facility.

Once the facility has submitted all required documentation and all renovations and repairs have been completed to the facility a ~~final~~ ^{possible} final inspection for a temporary license will be conducted.

(T.A.) Technical assistance was provided on all initial new site inspections and observations. Mrs. Lambert inquired about weekend care or extended care. The licensing officials will get back with her on those inquiries. A green child care survey card was left with Farenti Lambert.
