Findings/Comments Per request of owner Debbie Brown, arrived at the facility to discuss with owner placement of a Utility Overhead transformer pole which is keeping facility from utilizing an area that was once a playground area but had to be relocated due to the placement of overhead transformer pole.

License official discussed with Ms Brown and Entergy lineman Brandon Russell about relocating transformer pole in order to utilizing playground area. License official explained that the transformer must be at least 30 ft away from playground area and owner measured and area that would be a possible placement for the transformer. With the lineman approval to remove in the current location to the new approved location in order to utilize the playground area, must be approved by MSDH regulation and Entergy guidelines.

Also discuss with owner Ms Brown, linking windows to help with the sunlight, and discuss adding shading over the playground area including swings sets and an area where the office is now located, extending that area connecting the adjacent building to add additional office space.
